

19.5Ft Folding Container Material List

Specification: L5950*W2500*H2500mm = 19.5' x 8.2' x 8.2'

Basic Features

Outside size Length 5950mm*Width 2500mm*Height 2500mm

Folded state 400mm(Height) 19.5' x 8.2' x 1.31'

Net weight Around 1300KG, 2866 lbs

Container top

External roof Ta0.5-0.6mm- color steel plate

Internal suspended ceiling Insulation fireproof fiber glass

Insulation board 50mm(2") fireproof core material

Framework T1.5mm general material Q235 2.5mm Q345 2.3mm

Hanging head 10mm hot plate with digital positioning hole by laser

Floor

Framework Bottom side beam: 2.3mmQ345; end side beam: 2.5mmQ235; cross beam: t1.5mmQ235;

Bottom plate T15-18mm Magnesium Fireproof Floor

Side panel

All outer/end plates 50mm sandwich board, rock wool, fireproof board, EPS customer optional

Framework T1.5mm-2.0mmQ235

Door

1 exterior door Steel frame; inner frame size: 800mm*2000mm*50mm bolt type, optional frame lock type

Window

2*Aluminum alloy white unilateral sliding window, frame 930/1200mm. 3 x 4 ft

Folding hinge

T3mm galvanized hinge (inner shaft stainless steel)

Electrical System

Electrical wiring must be safe and concealed, and installed in strict accordance with moisture- proof specifications. All electrical products must comply with UL/ETL/TUV certification and support Certification for US market

Technical index Voltage 110v, 60Hz.
Recommended to use the power within the safety range of not more than 1500w

Circuit composition Connect the circuit according to the circuit engineering specifications.
Indoor; wall socket. Light switch, LED light 2X16w.

Socket distribution A front-end American standard socket with a switch,
and a back-end American standard socket(ALL WITH USB), all must be grounded

Protective coating

Overall framework Environmental protection water paint, electrostatic spraying

Quality assurance

Structure Domestic 5-year warranty (except MGO floor).
Due to the uncertainty of foreign environment, the warranty is not covered for
oversea buyers
